API Endpoint Name	API Endpoint Path	Field Name	Description	JSON Path
All Events Detail	/allevents/detail	bldgName	Building Name	property.address.bldgName
All Events Detail	/allevents/detail	country	The ISO-3166-2 country code	property.address.country
All Events Detail	/allevents/detail	countrySubd	For the U.S. this is a state abbreviation	property.address.countrySubd
All Events Detail	/allevents/detail	line1	First line of the property address	property.address.line1
All Events Detail	/allevents/detail	line2	Second line of the property address	property.address.line2
All Events Detail	/allevents/detail	locality	The local city, town or hamlet of the postal address	property.address.locality
All Events Detail	/allevents/detail	matchCode	The indication of how well the address was matched against postal data	property.address.matchCode
All Events Detail	/allevents/detail	oneLine	Full property address on a single line	property.address.oneLine
All Events Detail	/allevents/detail	postal1	For the U.S. this is the 5-digit ZIP Code	property.address.postal1
All Events Detail	/allevents/detail	postal2	For the U.S. this is the ZIP+4	property.address.postal2
All Events Detail	/allevents/detail	postal3	For the U.S. this is the Carrier Route	property.address.postal3
All Events Detail	/allevents/detail	blockNum	Block number	property.area.blockNum
All Events Detail	/allevents/detail	countrysecsubd	The "county" name in the U.S.	property.area.countrysecsubd
All Events Detail	/allevents/detail	countyuse1	County-specific use code which is used to map the Universal Land Use Code field	property.area.countyuse1
All Events Detail	/allevents/detail	loctype	The type of location such as waterfront, beach, airport, etc...	property.area.loctype
All Events Detail	/allevents/detail	muncode	Municipality / Township Code	property.area.muncode
All Events Detail	/allevents/detail	munname	Municipality / Township Name	property.area.munname
All Events Detail	/allevents/detail	srvyRange	Range portion using the Township Range Survey System	property.area.srvyRange

API Endpoint Name	API Endpoint Path	Field Name	Description	JSON Path
All Events Detail	/allevents/detail	srvySection	Quarter portion using the Township Range Survey System	property.area.srvySection
All Events Detail	/allevents/detail	srvyTownship	Township portion using the Township Range Survey System	property.area.srvyTownship
All Events Detail	/allevents/detail	subdname	Subdivision name	property.area.subdname
All Events Detail	/allevents/detail	subdtractnum	Subdivision tract number	property.area.subdtractnum
All Events Detail	/allevents/detail	taxcodearea	Indicates the taxing district code as provided by the assessor	property.area.taxcodearea
All Events Detail	/allevents/detail	apprimprValue	Appraised Value of the improvement(s)	property.assessment.appraised.apprimprValue
All Events Detail	/allevents/detail	apprlandValue	Appraised Value of the land	property.assessment.appraised.apprlandValue
All Events Detail	/allevents/detail	apprttlValue	Total Appraised Value	property.assessment.appraised.apprttlValue
All Events Detail	/allevents/detail	assdimprpersizeunit	The assessed improved value per square footage of the property	property.assessment.assessed.assdimprpersizeunit
All Events Detail	/allevents/detail	assdimprValue	Assessed Value of the improvement(s)	property.assessment.assessed.assdimprValue
All Events Detail	/allevents/detail	assdlandpersizeunit	The assessed land value per square footage of the property	property.assessment.assessed.assdlandpersizeunit
All Events Detail	/allevents/detail	assdlandValue	Assessed Value of the land	property.assessment.assessed.assdlandValue
All Events Detail	/allevents/detail	assdttlpersizeunit	The assessed total value per square footage of the property	property.assessment.assessed.assdttlpersizeunit
All Events Detail	/allevents/detail	assdttlValue	Total Assessed Value	property.assessment.assessed.assdttlValue
All Events Detail	/allevents/detail	calcimprind	Derived Assessed Value of the improvement(s) Indicator	property.assessment.calculations.calcimprind
All Events Detail	/allevents/detail	calcimprpersizeunit	A field calculated to show the per square foot value of the property	property.assessment.calculations.calcimprpersizeunit

API Endpoint Name	API Endpoint Path	Field Name	Description	JSON Path
All Events Detail	/allevents/detail	calcimprvalue	Derived Assessed Value of the improvement(s) used to calculate property tax	property.assessment.calculations.calcimprvalue
All Events Detail	/allevents/detail	calclandind	Derived Assessed Value of the land Indicator	property.assessment.calculations.calclandind
All Events Detail	/allevents/detail	calclandpersizeunit	A field calculated to show the per square foot value of the land	property.assessment.calculations.calclandpersizeunit
All Events Detail	/allevents/detail	calclandvalue	Derived Assessed Value of the land used to calculate property tax	property.assessment.calculations.calclandvalue
All Events Detail	/allevents/detail	calcttlind	Derived Total Assessed Value Indicator	property.assessment.calculations.calcttlind
All Events Detail	/allevents/detail	calcttlvalue	Derived Total Value used to calculate property tax	property.assessment.calculations.calcttlvalue
All Events Detail	/allevents/detail	calcvaluepersizeunit	A field calculated to show the per square foot value of the property	property.assessment.calculations.calcvaluepersizeunit
All Events Detail	/allevents/detail	mktImprValue	Market Value of the improvement(s)	property.assessment.market.mktImprValue
All Events Detail	/allevents/detail	mktLandValue	Market Value of the land	property.assessment.market.mktLandValue
All Events Detail	/allevents/detail	mktTtlValue	Total Market Value	property.assessment.market.mktTtlValue
All Events Detail	/allevents/detail	taxAmt	Tax Amount billed for the respective Tax Year	property.assessment.tax.taxAmt
All Events Detail	/allevents/detail	taxPerSizeUnit	The total taxes per square foot for the property	property.assessment.tax.taxPerSizeUnit
All Events Detail	/allevents/detail	taxYear	The respective year of the property taxes being provided	property.assessment.tax.taxYear
All Events Detail	/allevents/detail	high	Max range AVM value	property.avm.amount.high
All Events Detail	/allevents/detail	low	Min range AVM value	property.avm.amount.low
All Events Detail	/allevents/detail	scr	This represents the confidence in the calculation	property.avm.amount.scr

API Endpoint Name	API Endpoint Path	Field Name	Description	JSON Path
All Events Detail	/allevents/detail	value	The modeled AVM value	property.avm.amount.value
All Events Detail	/allevents/detail	valueRange	The difference between the low and high estimated (AVM) values	property.avm.amount.valueRange
All Events Detail	/allevents/detail	avmamountchange	AVM amount change	property.avm.AVMChange.avmamountchange
All Events Detail	/allevents/detail	avmlastmonthvalue	AVM last month value	property.avm.AVMChange.avmlastmonthvalue
All Events Detail	/allevents/detail	avmpercentchange	AVM percent change	property.avm.AVMChange.avmpercentchange
All Events Detail	/allevents/detail	avmID	AVM ID	property.avm.avmID
All Events Detail	/allevents/detail	monthlyChgPct	The month over month percent change in this property's estimated value	property.avm.calculations.monthlyChgPct
All Events Detail	/allevents/detail	monthlyChgValue	Change in estimated value (AVM) from the previous month	property.avm.calculations.monthlyChgValue
All Events Detail	/allevents/detail	perSizeUnit	Estimated value (AVM) per square foot of property	property.avm.calculations.perSizeUnit
All Events Detail	/allevents/detail	rangePctOfValue	Percent of Value Range the Target Value Represents	property.avm.calculations.rangePctOfValue
All Events Detail	/allevents/detail	ratioTaxAmt	Ratio of taxes to estimated value for the property	property.avm.calculations.ratioTaxAmt
All Events Detail	/allevents/detail	ratioTaxValue	This is the ratio of the annual taxes to the market value	property.avm.calculations.ratioTaxValue
All Events Detail	/allevents/detail	avmexcellenthigh	AVM excellent high	property.avm.condition.avmexcellenthigh
All Events Detail	/allevents/detail	avmexcellentlow	AVM excellent low	property.avm.condition.avmexcellentlow
All Events Detail	/allevents/detail	avmexcellentscore	AVM excellent score	property.avm.condition.avmexcellentscore
All Events Detail	/allevents/detail	avmgoodhigh	AVM good high	property.avm.condition.avmgoodhigh
All Events Detail	/allevents/detail	avmgoodlow	AVM good low	property.avm.condition.avmgoodlow
All Events Detail	/allevents/detail	avmgoodscore	AVM good score	property.avm.condition.avmgoodscore
All Events Detail	/allevents/detail	avmpoorhigh	AVM poor high	property.avm.condition.avmpoorhigh
All Events Detail	/allevents/detail	avmpoorlow	AVM poor low	property.avm.condition.avmpoorlow

API Endpoint Name	API Endpoint Path	Field Name	Description	JSON Path
All Events Detail	/allevents/detail	avmpoorscore	AVM poor score	property.avm.condition.avmpoorscore
All Events Detail	/allevents/detail	eventDate	The date when the value was determined	property.avm.eventDate
All Events Detail	/allevents/detail	condition	Indicates the Building Condition	property.building.construction.condition
All Events Detail	/allevents/detail	constructiontype	Construction Type	property.building.construction.constructiontype
All Events Detail	/allevents/detail	foundationtype	Indicates the type of foundation for the primary structure on the property	property.building.construction.foundationtype
All Events Detail	/allevents/detail	frameType	Construction materials used for the interior walls	property.building.construction.frameType
All Events Detail	/allevents/detail	roofcover	Indicates the primary finish material of which the roof is made	property.building.construction.roofcover
All Events Detail	/allevents/detail	roofShape	Indicates the primary roof framing structure (A-Frame, Gable, Mansard, etc.)	property.building.construction.roofShape
All Events Detail	/allevents/detail	wallType	Indicates the primary exterior wall covering material	property.building.construction.wallType
All Events Detail	/allevents/detail	bsmtsize	The total area of the basement, in square feet	property.building.interior.bsmtsize
All Events Detail	/allevents/detail	bsmttype	Indicates if the basement is finished or unfinished	property.building.interior.bsmttype
All Events Detail	/allevents/detail	floors	This field indicates the primary type of flooring in the structure	property.building.interior.floors
All Events Detail	/allevents/detail	fplccount	Indicates the number of fireplaces on a property	property.building.interior.fplccount
All Events Detail	/allevents/detail	fplcind	Indicates the presence/absence of a fireplace	property.building.interior.fplcInd
All Events Detail	/allevents/detail	fplctype	Indicates the type of fireplace the property contains	property.building.interior.fplctype

API Endpoint Name	API Endpoint Path	Field Name	Description	JSON Path
All Events Detail	/allevents/detail	garagetype	Indicates if a garage exists on the property and any additional information about the garage such as attached / detached, etc...	property.building.parking.garagetype
All Events Detail	/allevents/detail	prkgSize	Garage square footage	property.building.parking.prkgSize
All Events Detail	/allevents/detail	prkgSpaces	The total number of parking spaces exclusive to the property	property.building.parking.prkgSpaces
All Events Detail	/allevents/detail	prkgType	Indicates if parking type is garage or carport	property.building.parking.prkgType
All Events Detail	/allevents/detail	bathfixtures	Number of bathroom fixtures in the entire parcel (sink, toilet, bath, shower) and could be used to calculate the number of bathrooms	property.building.rooms.bathfixtures
All Events Detail	/allevents/detail	baths1qtr	Number of Quarter Baths - typically sink only	property.building.rooms.baths1qtr
All Events Detail	/allevents/detail	baths3qtr	Number of Three-Quarter Baths - typically sink, toilet, and shower (Very similar to full bath)	property.building.rooms.baths3qtr
All Events Detail	/allevents/detail	bathscalc	The sum of the values of the bathrooms	property.building.rooms.bathscalc
All Events Detail	/allevents/detail	bathsfull	Number of Full Baths - tyically sink, toilet, shower and/or bath tub	property.building.rooms.bathsfull
All Events Detail	/allevents/detail	bathshalf	Number of Half Baths - typically sink and toilet	property.building.rooms.bathshalf
All Events Detail	/allevents/detail	bathstotal	The total number of rooms that are utilized as bathrooms (Includes partial bathrooms and value may be interpreted)	property.building.rooms.bathstotal

API Endpoint Name	API Endpoint Path	Field Name	Description	JSON Path
All Events Detail	/allevents/detail	beds	The total number of rooms that can be qualified as bedrooms	property.building.rooms.beds
All Events Detail	/allevents/detail	roomsTotal	The total number of rooms for all the buildings on the property (If multiple buildings exist, the values are aggregated)	property.building.rooms.roomsTotal
All Events Detail	/allevents/detail	bldgsize	Total square feet of all structures on the property	property.building.size.bldgsize
All Events Detail	/allevents/detail	grosssize	Gross square feet of all structures on the property	property.building.size.grosssize
